

## Didsbury I.O.O.F. Elect Officers

The election of officers of the Didsbury Lodge No. 18, I.O.O.F., was held Thursday evening last, when the following officers were elected:

N.G.: W. C. Ahlgrim  
V.G.: Roland Ahlgrim  
P.G.: C. E. Marcellus  
Secretary: W. R. Hartley  
Treasurer: John Goertz

## Silver Wedding.

A very enjoyable evening was spent at the home of Mr. and Mrs. C. C. Rinehart on Friday, November 29, in honor of their silver wedding, when about fifty friends and neighbors gathered to congratulate them. A short program was given, after which Mrs. Clarence Rinehart presented the couple with a four-piece silver tea service from their many friends.

The house was tastefully decorated with white streamers and bells, with touches of silver. The bride looked very nice in a white silk crepe dress with a white gardenia corsage and wore a silver bandeau on her head. The groom wore a lily-of-the-valley in the lapel of his coat.

A three-tier wedding cake decorated with silver centred the table, and a delicious lunch was served by the Misses Sherman, Fern Tuggle and Stella Nielson, following which the guests departed, wishing the happy couple many more years of wedded life.

## Royal Arch Masons Install Officers

The Joseph Stauffer Chapter of Royal Arch Masons held their annual installation ceremony Wednesday evening last, when the following officers were installed:

Z. H. Matthews, Torrington  
I.P.Z. T. N. T. Priest, Crossfield  
H. W. G. Liesemer, Didsbury  
J. T. Johnson  
Scribe E. Dr. Clarke  
Treas. J. A. McGhee  
S.N. R. A. Craig, Olds  
P.S. G. H. Burke  
S.S. J. Matthewson, Crossfield  
J.S. J. Munroe, Carstairs  
Tyler H. Pearson, Didsbury

## New Alberta Map Issued.

A new map of Alberta, produced in co-operation with the Department of Lands and Mines, Province of Alberta, has just been issued by the Department of the Interior at Ottawa. The new publication is not only a road map showing surfaced and improved earth roads and railways, but is also sub-divided into townships and ranges to demonstrate locations. The scale is 35 miles to the inch and is now available for distribution by the Technical Division of the Department of Lands and Mines.

## BIRTHS

December 6, to Mr. and Mrs. Tom Morris a son.  
December 6, to Mr. and Mrs. William Harder a son.

## N. S. Clarke Gives Convention Report

Councillor N. S. Clarke gave the following report at the Westerdale Council Meeting last week.

"The municipal convention just held in Edmonton will go down as an expression of the keenest interest in municipal government ever shown in this Province with a good attendance of delegates to the number of 210, and at times almost an equal attendance of visitors, all showed a desire to get acquainted with the new government and alert to its possibilities. The Premier and three of his ministers addressed the convention and expressed their willingness and a desire to work with the municipal councils for better government and to help those in need who expressed a desire to help themselves.

Eighty-four resolutions came before the convention of which fifty-four were passed, mostly after a keen debate on each question. The ones receiving the most interest were the secondary highways, market roads and class C roads, Mr. Fallow the minister of public works was questioned very keenly on his road and bridge policy. His answers mostly ended with the need of more money for such work, as our roads and bridges are in need of more maintenance in order to keep up with the truck and car transportation.

A great many expressions of confidence in the Hon. C. Cockcroft minister of municipal affairs, were heard. He had a wonderful grasp of his work for the short period he has been in office.

Public health and hospitalization received their full share of consideration and the new minister of health was questioned very closely a demand that the Government give free treatment for all tuberculosis patients and to continue and enlarge health services throughout the province.

Our executive, in meeting our premier, found him very much interested in school affairs and not at all satisfied with present conditions, he expressed himself in favor of larger school districts, more supervision and an equalized tax for school purposes. He threw the challenge to the rural people to give him support as his desire was a better condition throughout the province.

A keen desire was shown for some form of crop insurance but as this is a big question and entailed a lot of thought and expense nothing definite was done.

Mr. Longman, field crop commissioner, addressed the convention to some length regarding the serious seed situation for the coming year. He requested every farmer to take steps at once to provide himself with seed before it is shipped out of his district or the province.

## At The Movies.

This Saturday the attraction is "Two Heads on a Pillow" one of the few very witty domestic comedies of the year.

Theatre-goers need have no fear in viewing "Two Heads on a Pillow", which was directed by William Nigh, who never lost a single chance to inject good clean, amusing fun into every scene in the picture, with Neil Hamilton, Miriam Jordan, Henry Armetta and Hardie Albright in the top spots, backed by a cast that is second to none.

Next Wednesday and Thursday Shirley Temple, the world's favorite child actress, will again be here this time in "Our Little Girl". The "happiness girl," singing, dancing, smiling, charming, plays at being happy though her whole world was crumbling. She is supported by Rosemary Ames, Joel McCrea, Lyle Talbot and Erwin O'Brien Moore. The Didsbury movie fans have always come out in crowds to see Shirley and they have never been disappointed.

## New Social Credit Group.

On Monday, December 2 at a meeting of Social Credit Study Group No. 1, a motion was passed and carried to dissolve the group, and on Saturday evening, December 7, a few of the members assembled at the home of Mr. and Mrs. M. Weber for the purpose of organizing a new Social Credit group.

At this meeting the "Didsbury Pioneer Social Credit Group" was organized and the following officers elected:

President: Manasseh Weber  
Vice-President: Henry Erb  
Secretary: Herbert Sinclair  
Treasurer: Otto Klein

A Scout was appointed, a board of five directors, and a social and lunch committee. The group has now over thirty members.

## "Y" Notes.

The "Y" Girls will hold their December meeting at the home of Mrs. E. Gasser on Tuesday evening next, the 17th, in the form of a "Taffy Pull." Each girl is requested to bring two cups of sugar. The bulk of the candy is used for the Christmas Cheer boxes which the girls give to the needy families in our town every year.

## Obituary.

SARAH FINLAY VOGEL.

Sarah Finlay Vogel was born in Belfast, Ireland, on December 25, 1882, and departed this life December 5, 1935, at the Royal Alexandra Hospital, Edmonton, Alberta, at the age of 52 years, 11 months and 10 days.

Deceased came to Didsbury with the Finlay family in the year 1904 and was married to Albert Vogel in 1918, to which union was born one son, Lloyd.

She leaves to mourn their loss, her husband and son Lloyd; four sisters, Mrs. Robert Brown, Mrs. James Hughes, Miss Maggie Finlay, Mrs. Earle Agnew, and one brother, James Finlay, besides other relatives and many friends, who have known and loved her. She will be sadly missed from among us.

The funeral service was held at M.B.C. Church in Didsbury. A large number of friends gathered to show their respect and love for the departed one. The service was conducted by Rev. C. J. Hallman, assisted by Rev. C. E. Rogers, of Carstairs. Interment was made in the Didsbury Cemetery.

The sympathy of the entire community is extended to the sorrowing loved ones.

## Gift Suggestions - for EVERY Member of the Family

### for Mother

Large Assortment of Fancy Dishes 15c to \$2.50  
Glass Water Sets..... \$1.50 and \$2.25  
Carving Sets..... \$1.29 to \$7.50  
Serving Trays, something new \$2.50 and \$3.25  
Pyrex Ware—complete assortment 15c to \$2.65  
Chests of Silver—Community and Rogers..... \$7.50 to \$19.95  
Silver cake plates, bread trays bon-bons, etc..... 75c to \$5.00

### for Dad

Wilkinson, and Rolls Razors \$3.25 and \$6.95  
Eveready Flashlights..... 65c to \$2.25  
Ash Tray Sets..... 40c to \$1.00  
C.C.M. Skate Outfits..... \$3.95  
Pen and Pencil Sets..... \$1.75  
Pocket Knives..... 15c to \$1.35  
Coleman Lanterns—gas or kerosene..... \$5.75

### for Sister

C.C.M. Skate Outfits..... \$2.95 and \$3.95  
Toy Sewing Sets..... 15c to \$1.75  
Ma-Ma Dolls..... 59c. 79c. 98c. \$1.29  
..... \$1.59 and \$6.50  
Large Assortment Soft-filled Dolls 15c to \$1.29  
China, Aluminum & Glass Tea Sets 15c to \$1.98  
Large Assortment of Games..... 15c to \$2.50

### for Brother

C.C.M. Skate Outfits..... \$2.95 and \$3.95  
Hockey Gloves and Shinpads... \$1.00 to \$4.00  
Hockey Sticks..... 25c to \$1.25  
Pocket Knives..... 15c to \$1.00  
Large Assortment of Toys, including cap and popguns, new streamlined trains, dump trucks and buses with electric lights. All the latest games and a large assortment of mechanical toys.

Our store is chuck full of Christmas Suggestions—bring the kiddies in to see the most complete stock of toys ever displayed in Didsbury.

### Difficult Problems

The problems which it may be expected will be discussed at the pending conference between representatives of the Federal government and premiers of the Canadian provinces will furnish plenty of material for conversations and negotiations.

If only one half of the difficulties which the western provinces have recently experienced and still are experiencing in finding sufficient revenue to maintain their ordinary services, to saying nothing of contributing substantially towards the cost of relief, can be removed a forward step will have been taken, and representatives of the provinces will leave Ottawa with something a little more tangible than hope for speedy recovery and for future progress.

One of the factors in the present situation that will have to be faced squarely is the fact that the cost of government is pressing heavily on the taxpayers, that there is just so much money available for the upkeep of services and that a shifting of burdens from one unit to another is not the way out of the trouble, though it may be a temporary palliative.

If several buckets are dipping water out of a well which is not being replenished from natural sources it is only a question of time when the well will run dry, and in the long run it does not make very much difference which of the buckets took most of the water out of the well.

That is actually the position of the taxpayer in western Canada. There are three buckets drawing on his resources, the federal, the provincial and the municipal, the last-mentioned, of course, including the schools.

The permanent solution of the difficulty lies not so much in a decision as to who is to be allowed to draw the most, or the least, water from the well but how the well is to be replenished, and until this can be determined, those in authority will have to address themselves to the task of finding ways and means of conserving the presently available supply and making the utmost of it.

There are many ways in which a conservation policy might be put into effect and one of the most practicable would be to eliminate a good deal of duplication and overlapping of services which have grown up, apparently without any blame attachable to any one in particular for the situation.

There are, for example, services which are being provided by both federal and provincial governments resulting in double costs for machinery and operation, in addition to a degree of confusion and ineffectiveness attendant upon two unrelated organizations trying to reach the same good by different roads.

In this category might be included debt adjustment machinery and to some extent agricultural services rendered by both federal and provincial administrations. These are only cited as illustrations of a number of fields of endeavor in which co-ordination of effort by a merger of duplicated services would not only bring about greater efficiency but would also save considerable expense to the taxpayers.

It is true that in connection with these and other activities in the same category objection might be raised that dual services are essential because of the limitations of legislative competence, but if that is the sole barrier in the way of economy, then necessary legislative authority to dissipate the difficulty should be sought and doubtless could be secured if a spirit of true co-operation on the part of all concerned is evidenced.

In the matter of sources of revenue also there is duplication which should be eliminated by a better defined allocation of spheres of taxation as between the several governing units. There should not, for instance, be two income taxes with two sets of costly machinery to gather the same type of tax from the same taxpayers, necessitating a double expenditure.

In pre-war and pre-depression years the fields of taxation were fairly well defined and understood and governments, in those days, confined their revenue collection efforts within well defined channels. First departures from recognized practice and prerogative came with the emergency demands of the war and subsequently, as financial and economic stringency became more severe, governments were loath to abandon what they had gained.

On the contrary, the practice of encroaching on one another's sources of income assumed serious proportions as the level of the water in the well declined and the demand for more and more water grew with greater intensity.

With this situation confronting them, the participants in the conference will face a difficult task. While, no doubt, many suggested methods for replenishing depleted incomes will be offered, first thought probably will be given to conservation of the existing resources, and one of the most practicable means of doing this will be to stretch the tax dollar by eliminating duplication. This can be done, not only without impairing the services involved but should result in improving them and at a lesser cost.

The official edict has gone forth that the new styles for the ultra fashionable gowns will not embrace any wasp waists. There will, though, be a sting in the prices.

Although the feathers of silkies may be either white or black, their skin is always black. They are the Negroes of the fowl race.

Harvard finds that the interior temperature of an ordinary star is 2,000,000,000 degrees. With a 19-year-old admirer in pursuit, it is naturally more.

Stone Mountain is a massive dome of muscovite granite in De Kalb county, Georgia, and is said to be the largest in the world.

### Finds Blindness No Handicap

#### War Veteran Has Developed Memory To Remarkable Extent

Captain Gerald Lowry, a blinded veteran of the World War, recently was one of the champion pair at the British Bridge League Congress at Harrogate, England. His partner was a woman. Not only did they win but they were always the first pair to finish their hands.

Blindness has its compensations. Nature to some extent redresses the balance by developing other faculties. Captain Lowry is a remarkable example of overcoming the handicap and lives a more active and normal life than most people. He has developed his memory to such an extent that when a friend whispers the designations of his cards to him he remembers them throughout the game and where he has arranged them. When he has to play dummy, the cards are named to him and he remembers them, too. The rest is easy. During the Harrogate tournament he played 32 calls and never forgot a card.

Captain Lowry before the war was an ardent golfer and amateur boxer. He still plays golf and boxes. He tees his own ball and drives by instinct. His caddy tells him where his ball lies and where he should hit it to, and he never misses. He also learned osteopathy and has built up one of the most lucrative practices in London. — St. Thomas Times-Journal.

### Began In Ice Age

#### Scientists Believe Recent 'Quake' Originated 25,000 Years Ago

Persons whose sleep was interrupted by the recent earthquake may blame it on the great Ice Age.

It is at least 25,000 years since the Ice Age ended, scientists estimate, but it was these same scientists who fixed its guilt.

Dr. L. C. Conant, director of the Cornell University seismological station, explained the general theory of earthquakes in the northeast is the earth is gradually recovering from the burden of a sheet of ice one to two miles thick.

"The melting of this tremendous glacier," he said, "took a tremendous pressure off the earth's crust. Every once in a while the earth stretches back a bit, moving just a trifle upward and northward. As a matter of fact, our instruments indicated there was a slight tilt to the north."

### Bigger Braille Library

#### Books Are Large And More Space Is Required

The rebuilding of part of the National Library for the Blind, in Great Smith-street and Tufon-street, Westminster, England, which has now been completed, provides extended accommodation for about 250,000 Braille volumes, together with up-to-date facilities for receiving and despatching books and music on loan to blind readers in the British Isles.

Considerable storage space is required in a library of this kind, as an average Braille volume measures 14 inches by 11 inches, and weighs five pounds.

The number of volumes circulated averages 1,200 per day.—Overseas Daily Mail.

### Are You Rundown, Tired?

Mrs. Mabel Murphy of 13 Westinghouse Ave., Apt. 4, Hamilton, Ont., said: "About five years ago I was terribly rundown, had indigestion, couldn't sleep or eat, lost strength, and my weight fell off 20 pounds. Before I had finished the first bottle of Dr. Pierce's Favorite Prescription I felt much better, had more strength and better digestion." New size, tablets 50 cents, liquid \$1.00. Large size, tablets or liquid, \$1.35.

### Cannot Get Italian Marble

League of Nations' sanctions against Italy have created an unusual situation in connection with the new League palace which was scheduled to be occupied in November. Most of the Rose marble used in construction of the palace comes from Italy, and much of it is still due to arrive. League sanctions prohibit the reception of goods under existing contract, so the League must look for its marble elsewhere.

Lithium, potassium, and sodium, the three lightest known metals, will float on water. 2125

### Science Tackles Lipstick

#### Produce Miracles With The Aid Of Delicate Scales And Chemical Reactions

As the result of exhaustive laboratory experiment, chemists have succeeded in reducing lipstick manufacture to an exact science. The relation of the temperature of the lips, the degree of moisture and the influence of fats are now expressed in scientific equations.

The bloom of human lips, long celebrated in song and story, has been accurately measured with the aid of delicate scales and chemical reactions. The new scientific lipsticks produced in German laboratories and recently demonstrated at the Leipzig fair, are said to be contact proof, moisture resisting and to assure a uniform appeal for days on end.

### 1935 Tobacco Crop Valued At \$8,000,000

#### Flue-Cured Tobacco Industry In Ontario Run On Scientific Lines

It looks as if the \$8,000,000 valuation put upon the Ontario flue-cured tobacco crop by the experts will be exceeded by the value of the actual purchasing made by Canadian and British manufacturers within the past few days. Yet it is only a few years since tobacco-growing in Canada was practically limited to a few farmers raising it for personal use or for a limited local market. Now approximately 30,000 acres of the best soil in Southern Ontario are almost exclusively devoted to the growing of tobacco leaf in a scientific way, this year's crop amounting to 30,000,000 pounds, and having a selling-value \$3,000,000 in excess of the crop return of 1934. The finest cigarettes and other tobacco products in Canada incorporate Canadian tobacco in large and increasing quantities, where, hitherto, American and other tobaccos had been used, while the Canadian leaf also has an excellent market in Great Britain in competition with foreign leaf.

The Imperial Tobacco Company of Canada, Limited, which buys a great part of the Canadian crop, has had much to do with the great strides taken by the tobacco-growing districts because it has had a policy for years of trying to encourage domestic production. First, however, it was necessary to gradually teach growers what and how to grow in order to meet public tastes long accustomed to foreign leaf. The company, at its own expense, imported cultivation experts, brought in the necessary plants for experimentation, made its own chemical and other researches of the soil, of moisture, and other conditions contributory to the best grades of tobacco, taught the grower on his own land by introducing experimental plots, and in other ways interested him in improving and enlarging his crop for the uses of the domestic market. It also illustrated to him the precise processes by which the domestic market might be developed in a profitable way. This, and the researches of government experts, combined largely to producing the present condition, and to the creation from a small and unmarketable crop, a large and marketable crop, valued at more than \$8,000,000 a year.

### London's Debt To Thames

#### City Is In Real Sense Founded On Ships

Its growth into the largest city of the country and of the world is owed by London to many historical accidents and to one very important fact—its geographical position. The seat of government might have been elsewhere and London might have had to share its political ascendancy with Winchester or New York. But it was almost inevitable that a large trading community should be established around the lowest bridge on the Thames, which flows into the narrow seas heading to the Continent and to the world. The Thames is the root cause for London's existence, and the city is in a very real sense founded upon ships.—P.L.A. Monthly.

## BACKACHE

IF you have backache, dizzy spells, headaches, do not neglect your kidneys. Take Gin Pills for prompt relief at the first sign of these symptoms. You will feel better, look better—be better, if your kidneys are functioning properly. 245

## Scientists Claim Islands On Atlantic Coast Are Being Slowly Washed Away

Prince Edward Island and the Magdalen Islands are being steadily washed away by the seas, according to an expert government hydrographer who has just completed a survey of their coastlines. Soft red soil of these Gulf of St. Lawrence islands, without the protection of solid rock formation, he said, makes them fall easy prey to the unceasing motion of angry waves. In two places Prince Edward Island has been nearly cut in two.

"But islanders need not worry," the expert, H. L. Leadman of Ottawa, commander of the hydrographic survey ship Cartier, reassured us. "Mother Nature acts slowly and terra firma is guaranteed the populace for many generations to come."

Then with a laugh he added: "We'll probably all be washed away before these islands disappear. The process is so slow."

Of course there were points that were disappearing faster than others. "The Magdalen Islands are changing continuously. There's Old Harry Head on Coffin Island that is falling away at the rate of 20 to 30 feet a year. The soft red sandstone is just disappearing for the cliff drops sharply down to two fathoms and there's no sign of where the soil goes."

Prince Edward Island was a scant two miles of being cut in two by the Hillsboro river and the inlet on the north side. But the wearing away process had eased up here and nature had defeated its own purpose by building up sandbar protection against its forces.

The Cartier has been employed since 1910 in surveying Maritime provinces and Gulf of St. Lawrence waters. It has just been laid up for the winter at Charlottetown after sounding an area of 12,600 square miles bounded by the northern tip of Cape Breton Island, Newfoundland, Anticosti and Prince Edward Island.

The ever changing coastline makes constant vigilance necessary in order to preserve the safety of sea-lanes. The Cartier is a quasi policeman searching for upthrusts of rock, arch-enemy of liners.

In the chart-room of this 700-ton government survey ship is the magic eye that penetrates fathoms and automatically takes photographs of the ocean bottom.

"That machine," said Commander Leadman as he pointed to an intricate arrangement in the corner of the chart-room, "is the most modern type of echo sounding gear. It photographs a picture of the bottom by a system of sound vibration."

Then he unrolled several feet of pictures that showed the bottom of the sea. They were taken off St. Paul's Island at the northern tip of Cape Breton.

"See those vague objects above the ocean floor?" he asked, pointing to his iodine-colored graph. "They are schools of fish which inadvertently got photographed. You see when schools of fish are dense enough they too return sound waves that are recorded by the sensitive apparatus."

Saline density and low temperatures sometimes made the machine inaccurate when the experts had to recalculate the actual depth of water. In the Gulf of St. Lawrence, 200 fathoms down, the water was below freezing, registering minus two and minus three degrees centigrade.

The Cartier's work was mostly a task of filling in the gaps in British admiralty charts, plotted as early as 1812, Commander Leadman explained. Once in a while they ran across dangerous shoals. Off Cape Whittle on the Labrador shore, adjacent to the shipping lane, they had located a threatening rock 30 feet from the surface.

In surveying the coastline, aerial photography was done first, then with it as a guide, the Cartier began her submarine photography. It was a far cry from the days of the early sounding of the gulf by the admiralty with their crude apparatus to the ocean-floor photography of to-day, the government expert remarked, but the admiralty's small scale charts are surprisingly accurate," he added.

### Antelope Herds Increase

#### Ranchers Claim That They Are Becoming A Nuisance

Harassed by ever-increasing herds of antelopes, fleet-footed roamers of the foothill country, southern Alberta ranchers are wondering what could be done to save their pastures for cattle and sheep.

The animals, once threatened with extinction, were protected with conservation measures and have multiplied so rapidly an open season was declared this year but Royal Canadian Mounted Police reported no applications for the special license to hunt them have been received.

The license, costing \$5, allows hunters to bag two of the antelope.

Cattlemen complain the antelopes are eating grass needed for cattle and sheep, besides attacking hay stacks. One Wild Horse, Alta., rancher said it costs him the wages and keep of a man and the keep of three hounds in his efforts to drive the animals from his land where they eat his alfalfa, break into his hay stacks and steal the pasture of his cattle herds.

Near Wild Horse, in southeastern Alberta, a herd of 1,000 antelope was reported, while other large herds were seen within a mile of Coalhurst, a mining town eight miles west of Lethbridge.

Had not conservation measures been taken, it is doubtful whether any of these antelopes—the pronghorn antelopes—would have survived. Protected in 1914 and 1915 by establishment of sanctuaries in Wawaskey and Nem'scam national parks and rigid defence of the few herds which roamed the short-grass country in southeastern Alberta, their numbers have increased to thousands.

Flesh of the animals is very delectable, which accounted for the protective measures taken. Indians were killing them wholesale before game officials stepped in.

Hunters, however, are prevented by the short open season—Nov. 1 to 11—and the bag limit of two, from giving any material assistance to ranchers.

### Problem For Hostess

#### Masterly Stroke Of Housewifery Met Difficult Situation

Suppose you were the wife of the governor of Massachusetts, suddenly called upon to serve dinner to a French admiral and 300 officers. You had invited the admiral, but never guessed he would ask to bring all his men with him. Where would you get quick supplies for the banquet, including fresh milk for so much home cooking? asks a writer in the Boston Transcript. Nowadays the task would be simple, with orders promptly given by telephone. But Mrs. John Hancock, wife of the Bay State's first governor, faced a serious crisis. In the Boston of her day, a reliable historian tells us, it was flatly "impossible to secure in legitimate ways milk enough for such a multitude at short notice. So, Mrs. Hancock dispatched her servants to the Common with direction to milk all the cows grazing there and to send to her any person who complained. The owners were rather amused than offended by this masterly stroke of housewifery, and no one is known to have protested.

### Made Good Impression

The young man waited patiently while the girl at the cashier's desk looked carefully at the new \$10 bill he had just handed her. She turned it over a couple of times, held it up to the light, felt it with her fingertips and then almost reluctantly rang up her cash register and counted out the change.

"Would you know a bad one if you saw it?" the young man asked.

Outraged surprise flitted across her face and then suddenly she grinned and shook her head.

"I don't think so," she said, confidentially, "but the boss was looking at it and it makes a good impression on him."

### Dairy Industry Of Canada

#### Official Of National Council Sees Big Export In Future

Appeal for "close and intelligent consideration to the betterment of Canadian agriculture" was made by Allan C. Fraser, secretary manager of the National Dairy Council of Canada.

Speaking at a Canadian Club luncheon in Montreal, Mr. Fraser reviewed what he called "the romance of Canadian dairying" and described the industry as part of the life-blood of the nation.

History of the dairying industry was traced by Mr. Fraser from its first stages in Asia, 2,000 years before Christ to the present day when in Canada alone there were 3,500,000 milking cows "operated" by 315,000 farmers. These farmers, he said, received an aggregate of \$200,000,000 per annum for their milk products which he said provided the "elixir" of life.

One of the great troubles in the Canadian industry, however, was the lack of uniformity in production, he said. For instance the provinces of Quebec and Ontario did not produce as much as they consumed yet the prairies, a long way from the eastern markets, produced more than could be used there.

It was such problems with which the industry was confronted, said Mr. Fraser, but with careful and intelligent consideration for these problems he thought "the day is not very far distant when, we shall be pretty definitely on an export basis for a considerable proportion of our production."

This, he concluded, would be the final answer to the difficulties outlined.

### Game Ducks Disappearing

#### Conservation Methods Must Be More Rigidly Enforced

Six types of game ducks in North America are threatened with extinction unless conservation methods are more rigidly enforced and natural enemies of the ducks are combatted, Harry C. Oberholser, senior biologist of the biological survey at Washington, said in Toronto recently. Mr. Oberholser was there for the opening session of American Ornithologists' Union convention.

The shoveller, redhead, canvas back, gadwall, ruddy, and buff head are fast dying out, he said. Contributing causes to their rapidly approaching extinction were pollution of their feeding grounds by oil waste from ships and manufacturing plants, duck disease and destruction of their eggs by crows.

The Calf Club Show of the Dominionwide Boys' and Girls' Farm Clubs at the Sherbrooke Winter Fair held recently was the largest assembly of its kind at a provincial exhibition. Two hundred and twelve Calf Club members from every district of the province of Quebec took part in showing 160 calves and yearlings and in the different judging contests for selecting teams to go to the Royal Winter Fair, Toronto.

## Responsibility Of Research Workers In Regard To Human Welfare

### Chalk As We Know It

#### Was Made Convenient For School Use By Dr. Field

One hundred years ago school chalk as we know it, was invented. The man who brought this priceless boon to the classroom was Dr. Francis F. Field, of Waltham, Mass. Up to that time the chalk used was the crude mineral brought from England, which was far less than satisfactory.

Dr. Field hit upon the idea of pulverizing the crude chalk, removing the grit, and then moulding it into convenient sticks. Of course there have been many refinements since that time, but the boys and girls in school to-day as well as those whose schooldays are over, might give thanks to Dr. Field on this centennial of his invention.

The blackboard with its chalk illustrations of the countless school problems, ranging from the ABC's to the stratosphere reaches of mathematics, has been an essential aid in the promotion of education. It goes with the pupil from kindergarten to university. The Chinese philosopher, who said, "one picture is worth 10,000 words," was paying an advance tribute to the blackboard and its 100-year-old teammate, chalk.

### Excessive Road Speed

#### Highways In Good Condition Are Temptation To Driver

Neither the authorities nor the public can afford to ignore the fact that traffic experts are practically agreed in declaring that speed is the outstanding cause of highway accidents. Automobiles of to-day are capable of making greater speed than ever before. They can be operated so easily over roads that, generally speaking, are in excellent condition that drivers unconsciously hit up their rate of travel to an unsafe speed. However mechanically perfect an automobile may be, it cannot be brought to a stop as quickly when running at 50 miles an hour as at 30. There is no doubt that thousands of accidents happen because motorists who do not consider themselves reckless drivers forget that at any moment they may be confronted by a situation that necessitates a quicker stop than they can possibly make. —Baltimore Sun.

### The Only Drawback

Two old settlers, confirmed bachelors, sat in the backwoods. The conversation drifted from politics and finally got around to cooking.

"I got one o' them cookery books once, but I never could do nothing with it."

"Too much fancy work in it, eh?"

"You've said it. Every one o' them recipes began the same way: 'Take a clean dish,' and that settled me."

## Make This Doll Elephant Mascot

Household Arts by Alice Brooks

A Boy That Is Quickly Made

PATTERN 5461

Even though the circus isn't here, this elephant gets applause. That's certain—whether he's a toy for the baby or a mascot for that young lady who has her favorites in football stars. He's a merry fellow and you'll be merry, too, in making him, for he goes together so easily. Do him in a gay print—do him in velvet—he's choice in either.

In pattern 5461 you will find a pattern and directions for making an elephant about 10 inches high; material requirements. To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

Science is growing into a Frankenstein monster which soon the scientists of the world themselves may not be able to hold in check.

This fear is expressed by Sir Richard Gregory, one of the greatest scientists in Britain. Other scientists agree with Sir Richard.

Two years ago, the British Association formed a "brain trust" in an attempt to put the monster in chains, but Sir Richard now admits that the attempt has failed.

A short time ago, Sir Richard in a dramatic speech at a Rotary luncheon at Norwich, Norfolk, defended the modern scientist and tried to explain that the man with a test tube is not a man with a load of mischief. He said that the use of good or evil of a discovery depended on the community.

Now, however, Sir Richard has changed his mind and frankly admits that there is justification in the increasing uneasiness and suspicion with which the ordinary man is viewing the efforts of the laboratories.

"Ethical considerations are almost totally non-existent among scientists," he observed. "To them new knowledge is the thing."

Just recently I saw a description in a technical journal of some new mustard gas.

"The scientist who published that paper did not speak of his discovery as a mustard gas. . . . He had merely effected a re-grouping of certain compounds."

"To him his achievement was merely an interesting piece of research in organic chemistry, and he just stated the facts. But the world has another dangerous gas."

"The biggest job which faces us to-day is to solve this old problem of the responsibility of the scientist with regard to his discoveries and the rest of the community."

"One item of research properly applied might find work for tens of thousands, and another throw thousands out of work. One result of research wisely applied may save human lives and another destroy them."

"It is manifestly wrong that the scientist's responsibility should end with the announcement of his discovery."

A. G. Church who, as an executive of the British Science Guild and the Association of Scientific Workers, was concerned with the British Association plans for a "brain trust" to maintain a check on discoveries and their applications is not hopeful for the future. He particularized:

"The efforts we made to get scientists to weld themselves together into a profession with a corporate sense of responsibility like lawyers, doctors, and others, have failed absolutely."

"Some time ago we made an attempt to find out how far scientists were prepared to limit themselves against work which might have harmful potentialities to the community."

"Professor Sir Frederick Soddy suggested a resolution that members should not accept subsidies to engage in special research work into poison gases for military purposes."

"Our members would have none of it. Eventually a resolution was passed to the effect that university teachers should not accept subsidies for such work as this would be contrary to the spirit and tradition of learning."

"The trouble is that the average scientist is far more arrogant about his work than the normal man, and he declines to admit any measures which he considers a restriction on the pursuit of knowledge."

"But 'this freedom' in research has great dangers to the world to-day."

"We ought to have an ethic like other professions. It is up to the great leaders of science to give a lead in this respect. It is time that the man in the laboratory realized how his work affects the man next door."

A locomotive built in England for use on a mountain railway in South Africa has six separate engines, any one of which can be disconnected in an emergency without impairing the efficiency of the others.

### Our Phone System.

News that the provincial government is considering the sale of the telephone system, if a good offer is made, has been received with varying opinions. The present need for revenue is obvious, and the avowed determination to balance the budget may result in action which would not be good business in the long run.

Although the provincial telephone system has not been a conspicuous asset, it has not been regarded as a failure until recent years. It has been the rural branch of the telephone system which has brought it into serious financial straits. The urban service has given a good account of itself. Under the scheme instituted last year sixty per cent of the rural telephone service has been reorganized under group-ownership and is no longer a financial drag on the publicly-owned system.

After February 1st rural subscribers not so organized will pay an increased toll of thirty-five per cent. This is through cancellation of the thirty-five per cent "premium" which has been rebated to farmers since 1932. One result of this will be the discontinuance of many lines or the forming of more mutual companies. It is anticipated that before many months the whole rural service will be in the hands of the group owners, leaving only the urban lines under provincial control.

It is generally believed that this will solve the telephone problem as a problem, and that it could then be regarded as a financially sound example of public ownership and operation. In view of this likelihood it seems rash to dispose of such a long-standing utility to meet any emergency needs. It might be regarded as a retrograde step.

Moreover, Alberta people have reason for pride in the efficiency of operation of this publicly-owned service. It compares favorably with any privately-owned companies. The officials are well trained and capable and have built up an enviable reputation in the Dominion. No change in ownership should be made without very serious consideration.—VULCAN ADVOCATE

### Doings of Our Neighbors

At CROSSFIELD: Arthur Heywood who was charged with resisting arrest and shooting at a policeman, was committed by Magistrate Gordon to stand trial at the next court in Calgary.

At OLDS: At an enthusiastic organization meeting held in the school Tuesday night of last week officers were elected and committees formed that assures the holding of a school musical festival in Olds next spring. The festival will be open to town and rural schools in the district.

At INNISFAIR: The schedule for the Central Alberta Hockey League has been released. Teams from Innisfail, Red Deer, Lacombe, Ponoka, Camrose, Stettler and Wetaskiwin, comprise the league.

Phone in any local news which you may have. We will appreciate it.—Thank you

### Mountain View Notes

The annual meeting of Mountain View W.I. took place at the home of Mrs. Max Woods, with Mrs. J. Hill presiding. "O Canada" opened the session, followed by repetition of the Creed and reading of the minutes, after which final arrangements were made for the dance on Dec. 6. The quilt raffled that evening was on display, and a hearty vote of thanks was accorded Mrs. Sheils, who so kindly donated the wool and lining. Another vote of thanks was accorded Mesdames Topley, Pearson and Sheils for completing the work on the quilt. Members were requested to bring to the January meeting their donations for the basket to be on exhibition in the store windows after Christmas. Mrs. Bennie St. Clair proved to be a very efficient auctioneer at the auction sale, the sum of \$3.35 being realized.

Election of officers resulted as follows:

President: Mrs. J. Hill  
Vice President: Mrs. Ed. Blain  
Secretary: Mrs. Bennie St. Clair  
Treasurer: Mrs. Ellis Barnes  
Those taking papers for the coming year are:

Mrs. Pearson: Household Economics.

Mrs. Ellis Barnes: League of Nations.

Mrs. Max Woods: Agriculture.

Mrs. Birdsall: Canadian Industries.

Mrs. B. St. Clair: Child Welfare.

Mrs. Wm. Coates: Immigration.

Mrs. B. A. Atkinson: Education and Better Schools.

Mrs. Bennie St. Clair was again elected social convener and Mrs. B. A. Atkinson as musical convener. A hearty vote of thanks was accorded Mrs. Garnet Tighe for her past services as secretary. The January meeting will convene at the home of Mrs. Ellis Barnes the third Thursday as usual, when all members are asked to robe in hardtime attire and bring membership dues, also any donations to the layette. A dainty lunch served by Mesdames Blain, Woods and Finlay closed the meeting, and a vote of thanks was given the hostesses.

### Westcott Notes.

Westcott W.I. met at the home of Mrs. Ed. Owens for the November meeting, which opened with the singing of the Land of the Maple Leaf and repetition of the Creed. A very interesting paper on Canadianization was given by Mrs. Ed. Klinek and followed by an open discussion on the subject. A very instructive contest was given by the hostess and the meeting closed with the serving of lunch.

Arrangements are being made to move the offices of the president and general manager of United Grain Growers Ltd. to Calgary early this next summer.

**Items of Interest**

At a price "considerably higher" than the local market the first shipment of hogs to U.S. points since August left Calgary stockyard just recently, consigned to Seattle. Numbering 160 the prime porkers were shipped in the best of shape and expected to top prices from coast citizens, who enjoy pork as part of the Christmas repast.

The average Canadian eats 68 lbs. of beef in one year, besides 66 1-3 lbs. of poultry. At least these were the consumptive figures for 1934. In that year Canadians increased their per capita meat consumption by 12 lbs. and decreased per capita pork consumption by 8 lbs. The switch was due to the increased price of pork and comparatively lower price of beef. The average Canadian in 1934 consumed 31 lbs. of butter and 268 eggs, to say nothing of 3 1/2 lbs. of cheese.

A. A. Mackenzie, chairman and supervisor of the unemployment relief commission of the Alberta government, has been named commissioner of new bureau of public welfare and relief, it was announced by Acting-Premier E. C. Manning. The new bureau will be a branch of the department of health under Hon. W. W. Cross, and will act as coordinator of all provincial and welfare services.

**Burnside Notes.**

Lone Pine W.I. met at the hall on Thursday afternoon last. After the usual business the election of officers took place for 1936, the following being elected President, Mrs. C. R. Liesemer, Vice-President, Mrs. W. Lyons, Sec.-Treas., Miss Gertie McLean, directors, Mrs. J. Garner, Mrs. E. Hunter and Mrs. H. Richardson; auditor, Mrs. B. Woods. The annual exchange of Christmas gifts took place and lunch was served, ending a pleasant year's activities on the part of the W.I.

Mr. Sam McAllister spent Sunday with Mr. and Mrs. N. Eckel.

Miss Evelyn Charlton spent the early part of the week in Calgary.

Mr. Geo. Metz and daughter, Alberta, spent Thursday in Calgary.

The first whist drive of the season was held at the home of Mrs. N. Eckel on Saturday evening. Honors were won by Mrs. P. Schumaker and John Homes while consolations were won by Mr. Chas. Morley and Mrs. N. Eckel.

We extend our congratulations and best wishes to Mr. and Mrs. Cecil Cipperley (formerly Miss Elva Liesemer) who were married in Calgary Saturday, Dec. 7. A wedding dance for the young couple was held in the hall on Monday evening, also a shower at the home of the bride's mother on Wednesday afternoon at both of which they were presented with numerous and valuable gifts along with the best wishes of the community for a long and happy married life.

**District Court.**

According to the Alberta Gazette the following dates have been set for holding district court at Didsbury during 1936:

Wednesday, February 5  
" May 13  
" October 7.

**REWARD!**

Two dollars a head reward to any one giving information leading to the recovery of the following 7 head of cattle which strayed from pasture near Lobley Post Office:

1 Pure white heifer coming 3 yrs.  
4 All black Angus (2 heifers and 2 steers) 2-year-old.  
2 Black with part white face (1 heifer and 1 steer) 2-year-old.  
All branded LA over half-diamond on right ribs.

L. A. MEYER, DIDSBURY.

**RUGBY NOTES**

With a large attendance of members and visitors Rugby W.I. held the last meeting of 1935 at the home of Mrs. August Krebs. The financial report showed a most satisfactory balance in the treasury, and all other matters of business were straightened out, thus leaving a clean slate for the new year. Officers elected to guide the destinies through the coming year were:

President: Mrs. Evans  
Vice-President: Mrs. Johnston  
Secretary: Mrs. Hasegood  
Directors: Mrs. C. Youngs, Mrs. A. Krebs, Mrs. A. Hogg and Miss Hasegood.

During the afternoon Miss Helen Wahl rendered a selection of Christmas music on the violin, and Miss Ray favored the meeting with a humorous recitation. A pleasing interruption took place when, having made a flying trip from the North Pole in order to be present at the meeting, Santa Claus appeared and distributed gifts around the circle. When the butterfly quilt was drawn for it was found that Mrs. Emil Krebs was the holder of the lucky number. Lunch was then served and after a pleasant half-hour was spent over the teacups the meeting dispersed and the members took their several ways home, to meet again in January at the home of Mrs. Cowitz.

## WORLD HAPPENINGS BRIEFLY TOLD

More than 80 anarchists have been arrested in Tokyo and Osaka and are being held on charges of planning an anarchist uprising.

The full name of the Duke and Duchess of Kent's son will be Edward George Nicholas Paul Patrick, it was unofficially reported. He will be known as Prince Edward of Kent.

Canada, in time, will have a population of 179,000,000, it has been predicted by Prof. Griffith Taylor, formally inducted into the new chair in geography at the University of Toronto.

People who live on streets with English, French and Belgian names in San Remo, Turin, Milan and other Italian cities have asked authorities to change them to "Aduwa", "Makale", or "Italia."

Sergeant-Pilot Park, whose home is in British Columbia, and two other men of the Royal Air Force, were instantly killed when two planes collided 1,000 feet over the Abingdon station.

The Alberta government will enforce the provincial Trade and Industry Act, after certain changes, the Calgary branch of the Retail Merchants' Association has been assured by Premier Aberhart.

The Young Women's Christian Association announced that Lady Tweedsmuir, wife of Canada's new governor-general, had consented to become patroness of the association in Canada.

Another step in the modernization of ancient Palestine was taken recently when the Arab town of Tul-karem, in the central part of the country, was illuminated with electricity for the first time.

Notwithstanding the recent series of fatal aeroplane crashes, U.S. senate commerce subcommittee investigators have concluded after a thorough survey that travel by air today is "three times safer than it was 10 years ago."

In Italy, where the cost of a radio receiver license is high, there are only about 200,000 listeners in a population of 40,000,000.

## Crochet a Rug For Your Home

Household Arts by Alice Brooks

This Rug and Pillow are in Three Colors

PATTERN 5469

Whether you use rags, rug wool or candlewick, you can make a stunning crocheted rug if you use this design. Three tones of one color or contrasting colors are effective. Use it in the bedroom, living-room or entrance hall—it will add much to your home. And the pillow matches it, thus repeating the decorative note. You'll find it an easy pattern to crochet. If you want to give someone something real big for Christmas, this would be a splendid choice.

In pattern 5469 you will find complete instructions for making the set shown; an illustration of it and of the stitches needed; material requirements.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

## Pioneers Honored

### Cairn Unveiled By Founder Of First Icelandic Settlement

The dramatic history of Icelandic pioneers who first landed on the shores of Lake Winnipeg in 1875, was fittingly marked 60 years after when a memorial was unveiled at Gimli, Man., by Captain Sigtryggir Jonason, first discoverer of the site of what is now Gimli.

Jonason, approaching his 80th year, brought the first group of Icelandic settlers to Gimli in 1875 from Moorhead, Minn., by way of Winnipeg. The party made the trip in scows constructed in Winnipeg, and sailed down the Red river and along the west shore of Lake Winnipeg to their new home.

The cairn, built of local granite stone, has a 13-ton red granite boulder fixed to the top, symbolizing the lasting qualities of the early pioneers. On the west side of the boulder, engraved in Icelandic and English, is the following inscription: "The first Icelandic settlers arrived here Oct. 21, 1875." The names of the various districts of the first settlement are carried on the reverse face of the cairn.

## Climbing Out Of Depression

### British Dominions Seem To Be Leading The World

Which are the nations who are climbing most rapidly out of the depression? They are the British nations. Canada's trade leaped up 22 per cent. last month. Inspiring news comes also from little New Zealand, where Mr. Coates, the finance minister, boldly states that the Dominion's economic problems are "largely solved". Cuts are being restored, emergency taxes reduced, pensions increased. On top of that Mr. Coates gives a new break to his countrymen. Population of New Zealand, 1,618,000; public works expenditure announced, £5,630,000. That means the inauguration of new boons and amenities for New Zealanders at the rate of £3 10s a head.—London Daily Express.

## Puncture-Proof Tires

### New Substance Prevents Rapid Escape Of Air In Blowout

A new invention is a substance which the car owner inserts in the tube through the valve aperture. This compound is composed exclusively of natural products which, according to the sworn statements of commercial chemists, are by no means deleterious to the rubber. Floating freely within the tube it is thrown by centrifugal force against the periphery so that should the tire and tube be punctured or ripped, this material is immediately thrown by pressure of the air into the opening. The result is that the puncture is immediately sealed by the substance. In case of a blowout, the substance prevents the rapid escape of the air and the car can be brought to a stop safely.

It is stated that this substance is not a conductor of heat and will not, therefore, transmit to the air the road heat absorbed by the tire tread. The weight and bulk of this substance are small. It cannot choke up valves, undergoes no changes during the whole life of the tire, and is perfectly harmless to clothes and hands. Its advantages, as can readily be seen, are numerous, one of the most important being that it gives a sense of security that enhances the pleasure of safe, carefree driving regardless of speed. The purchase price of this compound, incidentally, adds only 25 to 35 per cent. to the average price of a tube. It is at present being distributed widely in Germany and other countries.—Popular Science.

## Italy Produces New Wheat

### Ripens About Three Weeks Earlier Than Old Variety

In two decades, Italy has raised the nation's average wheat yield from 15 to 24 bushels to the acre. (In the U.S. the average yield is only 14 bushels to the acre). Now in an experimental tract near Rome, new strains of wheat have yielded 131 bushels to the acre. In addition this wheat ripens two or three weeks earlier than the old varieties and so escapes at a critical period the blistering winds from across the Mediterranean; it has a staunch straw which enables it to stand against wind and rain, and strong resistance to disease.—The Country Home.

## Endorses Light Clothing

### Welsh Doctor Believes It One Preventive Against T.B.

During a discussion on his annual report, Dr. Milton Jones, medical officer for Llanfyllin rural council, said he found girls under 20 were less susceptible to tuberculosis than boys under 20 and said the reason was that girls wore scanty clothing, which allowed sunlight and fresh air to get at them. Women, too, were less susceptible to tuberculosis than men because they wore less clothing. When the doctor said that with correct diet nobody need suffer from indigestion a member remarked that doctors suffered from indigestion. Dr. Jones replied that that was because doctors were so often called away from their meals.

One large duck farm in Eastern Canada is planning to ship 2,000 boxes of ducks to England before the close of navigation at Montreal and to hold them in storage for subsequent sale.

## ASK YOUR DOCTOR FIRST, MOTHER

### Before You Give Your Child an Unknown Remedy to Take

Every day, unthinkingly, mothers take the advice of unqualified persons—instead of their doctors—on remedies for their children.

If they knew what the scientists know, they would never take this chance.

## Doctors Say PHILLIPS' For Your Child

When it comes to the frequently-used "milk of magnesia," doctors, for over 50 years, have said "PHILLIPS' Milk of Magnesia—the safe remedy for your child."

Remember this—And Always Say "Phillips'." When You Buy. Your child deserves it; for your own peace of mind, see that you get it—Genuine Phillips' Milk of Magnesia.

### Also in Tablet Form:

Phillips' Milk of Magnesia Tablets are now on sale at all drug stores everywhere. Each tiny tablet is the equivalent of a teaspoonful of Genuine Phillips' Milk of Magnesia.

# PHILLIPS' Milk of Magnesia

## Fire Chief Battles Water

### Rescued People From Flooded District In Montreal

Arthur Ferron, acting district chief of the Montreal fire department, has celebrated the 30th anniversary of his joining the fire fighters. In the years since he joined the brigade he has been repeatedly decorated for brilliant rescue work at bad fires, but his greatest rescue had nothing to do with his arch enemy. In the half light of a below-zero dawn, a three foot water main burst in a crowded Montreal district. The streets were flooded and houses were collapsing when Capt. Ferron and his crew arrived. Despite the imminent danger, however, this veteran smoke-eater rescued two entire families who were on the point of drowning. For his bravery he received the Royal Canadian Humane Society's life-saving medal.

## CHAPPED SKIN? NO!

Warehouses At Calgary, Edmonton, Regina and Winnipeg

## The Man Who Knows

Whether the Remedy You are taking for Headaches, Neuralgia or Rheumatism Pains is SAFE is Your Doctor. Ask Him

Don't Entrust Your Own or Your Family's Well-Being to Unknown Preparations

BEFORE you take any preparation you don't know all about, for the relief of headaches; or the pains of rheumatism, neuritis or neuralgia, ask your doctor what he thinks about it—in comparison with "Aspirin."

We say this because, before the discovery of "Aspirin," most so-called "pain" remedies were advised against by physicians as being bad for the stomach; or, often, for the heart. And the discovery of "Aspirin" largely changed medical practice.

Countless thousands of people who have taken "Aspirin" year in and out without ill effect, have proved that the medical findings about its safety were correct.

Remember this: "Aspirin" is rated among the fastest methods yet discovered for the relief of headaches and all common pains... and safe for the average person to take regularly.

"Aspirin" Tablets are made in Canada. "Aspirin" is the registered trade-mark of the Bayer Company, Limited. Look for the name Bayer in the form of a cross on every tablet.

**Demand and Get "ASPIRIN"**

### Running Short On Food

A birthday party has been given in the Melbourne Zoo for a little platypus—an Australian duck-mole. He has set up a record by living a year in captivity. The platypus, which eats some 800 worms a day, is giving the zoo authorities a problem. The supply of worms is running out, so the curator is offering to buy worms at the rate of 3d. a pound.

## Mothers Aided by Guide to Better Control of Colds

Practical Plan Is Helping Families Everywhere to Have Fewer, Milder and Shorter Colds.

SIMPLE AND EASY TO FOLLOW

Already, thousands of Canadian mothers are benefiting by following Vicks Plan for Better Control of Colds—proving for themselves that it is a practical home guide to fewer and shorter colds.

This commonsense, medically sound Plan represents the 30 years' experience of Vicks Chemists in studying colds. It has been tested in extensive clinics by practicing physicians—further proved in everyday home use throughout the country.

Here, briefly, are the three simple steps in Vicks Plan:

**1. To Help Build Resistance to Colds**  
Live normally—avoid excesses. Eat simple food and keep elimination regular. Drink plenty of water. Take some exercise daily—outdoors preferably. Get plenty of rest and sleep.

**2. To Help Prevent Many Colds**  
At the first warning nasal irritation, snuffle or sneeze, use Vicks Va-tro-nol—just a few drops up each nostril. Va-tro-nol is especially designed for the nose and upper throat—where more colds start. Used in time, Va-tro-nol helps to prevent many colds—and to throw off head colds in the early stages.

**3. To Help End a Cold Sooner**  
If a cold has developed, or strikes without warning, rub throat and chest at bedtime with Vicks Vapo-Rub. Vapo-Rub acts two ways at once: (1) By stimulation through the skin, like a poultice or plaster; (2) By inhalation of its penetrating medicated vapors, direct to inflamed air-passages. Through the night, this combined vapor-poultice action loosens phlegm, soothes irritation, helps break congestion. What Vicks Plan can do for you and your family can be proved only by trying it. Directions for following the Plan come in each package of Vicks Va-tro-nol and Vicks Vapo-Rub.

"The Unknown Port", Etc.

### SYNOPSIS

Nancy Nelson is a sub-teen, a gay, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market crash, her indulgent father loses all he had, and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge.

Nancy set out one afternoon to climb to the top of a hill so as to obtain a view of the surrounding landscape and misses the path Aurora Tubbs had told her to follow. A truck comes along the road, driven by Matthew Adams, and she asks him which way to go. They ascend the hill, look around, and then go on to Cousin Columbine's. There Mark Adam tells Nancy that his brother Luke has broken his leg, and that Jack Nelson has been hired to help out while Luke's leg gets better. With Jack away, Nancy finds that she is lonesome, and having no books to read, the idea of starting a public library at Pine Ridge seems a good one, and Nancy writes home to get her parents to send all the books they could spare and all they could induce others to let them have.

Nancy's parents and friends gave their liberal support to her request for books, and a sizeable box arrived in due course. Father Adam painted a sign for the library, and the Adam boys worked on the shelves for the books and decorations to make the room look presentable.

Jack Nelson, Matthew Adams, and Nancy go to the prairie home of Matthews' uncle for the ride, and after Nancy and Jack leave for home, they are caught in a blizzard. Blinded by the swirling snow they collide with a bus full of school children, which was stalled across the road with its back wheels resting in a snow-filled gully. Their car being wrecked, Jack and Nancy stay with the children and do all they can to help. The next morning Jack sets out for help in the blizzard. He succeeds in finding help, and the party of children and Nancy are rescued. As a result of the exposure Nancy's feet are badly frozen and Jack is seriously ill with pneumonia, but both of them recover.

Now Go On With The Story

### CHAPTER XXIII.—Continued

Nancy started, smiling as she recognized the wife of the health-seeker on the back road, one of the library's most faithful visitors.

"Come in," she welcomed. "I'm leaving day after to-morrow and am glad of this chance to say good-bye."

The woman said, as she sat down in the cushioned chair: "That's why I came. I meant to stop at Miss Nelson's, but when I saw these open windows I knew you'd be here. I want to thank you for what you've done for—well, for every one in Pine Ridge, Miss Aladdin." She glanced up, her worn face lighted by a smile, while Nancy realized with something of a shock that this faded woman was quite young, probably not ten years older than herself. "Do you mind my saying, Miss Aladdin?" she questioned a bit shyly. "Sometimes I've almost wondered if that's what you are—a sort of magician who has worked miracles."

Nancy laughed, flushing a little too.

"It wasn't a miracle at all, if you mean this library. It was only common sense and a bit of elbow grease!"

"No," answered her caller wisely, "it was more than that. It was thinking how you could make life happier for other folks. It's made all the difference between exile and—home, to us!" she added. "My husband's better now, really better; and it's due to nothing in the world but having good books to read—something to take his mind away from himself and all our worries. Is it any wonder we think of you as Miss Aladdin?"

When she was gone Nancy sat there feeling strangely humble, a lump in her throat that threatened to grow bigger.

"I ought to have gone to see those people," she said regretfully. "I'll ask Matt to drop in on them some day. Why, the first time that woman came for books I thought she was older than Aunt Judy! Oh, why does life hurt some of us so cruelly?"

Rising with reluctance, Nancy closed the windows. This was her

## HERE'S The real way TO MAKE BRAN MUFFINS, COOKIES, ETC.

USE Quaker Natural Bran—because it is natural bran especially intended for baking. You'll find it makes better, tastier bran dishes with the real spicy, nut-like bran flavour. And that you'll have better results because, being natural bran, it mixes better and more lightly with other ingredients.

And what is doubly important Quaker Natural Bran is more economical for baking. Try it—there's a recipe folder and a valuable coupon in every package.

**QUAKER**  
**Natural Bran**  
ESPECIALLY ECONOMICAL FOR BAKING

**TRY THIS SUGGESTION**  
for a delicious, different dessert novelty  
Buttered Bran Raisin Bread  
Canned Cherries or Plums Coffee  
Look for the Quaker Natural Bran display at your grocer's. He has all the things you'll need for this appealing dessert. The recipe for Bran Raisin Bread is in the package.

last visit to the library, for to-morrow she must give to Cousin Columbine. The girl stood for a moment looking off at the mountain; and suddenly she longed to view it once again from the hilltop under the old pine.

"I'll sneak up back of the houses," she planned, locking the door. "If Jack sees me he'll want to go along, and somehow I'd rather be alone. I can stay a half hour and get back before the Adams send for us. I do hope Matt will have cheered up by evening. I just can't stand the way his eyes look."

By skirting the village it was possible to gain the hilltop unobserved, but it was a steep ascent, and Nancy was breathless when, emerging from the woods, she started toward the ancient landmark. Then, as an animal will stop when suddenly alarmed, the girl stood still. Some one was there, half hidden by the gigantic tree-trunk. How disappointing! Her tryst on this wonderful spot must be foregone. She ventured one cautious backward step, but a twig snapped under her foot, and the intruder, almost as startled as herself, turned quickly.

"Oh!" exclaimed Nancy. Her heart was thudding. "I didn't dream—I mean, Matt, I—I thought..."

She paused, for Matthew had sprung up, an unsmiling Matthew, who said, curiously, she noticed, as he came toward her: "Is it you, Nancy, or—or am I dreaming? No, I'm not crazy!" (He smiled a little.) "But I've been lying here for an hour or more wishing I had the power of Aladdin, so I could rub my lamp and—and make you appear before me just like this! Is—is it really you?"

Nancy thought, her mouth curving in a smile: "What other fellow in the world would say a thing like that?" Then with a sudden impulse she stretch out both hands.

"Touch me, and see!"

### CHAPTER XXIV.

No use trying; it was simply impossible to sleep. Thus thought Nancy as she turned, and tossed, and thumped her unoffending pillow. The night was weirdly bright, as most nights are in Colorado, and (perhaps because she knew where each one was), those furnishings of the tower room which seemed so depressing eight months before, were dimly visible: the fat infant embroidered on the "splasher"; the mineral specimen clock which never ticked; the deformed kittens painted in oils; General Grant, and Aurora's mammoth calendar.

"It's surely strange," murmured the girl, "how you get used to things. I don't see that awful embroidered baby any more, and I've grown quite fond of General Grant. It just doesn't seem possible that this is our last night in Colorado, and that to-morrow Jack and I'll be joggling along somewhere in Kansas. Why, the day we got here, when Cousin Columbine displayed this room so proudly, I thought I couldn't get away from it too soon; and now all I can think of is—suppose we hadn't come!"

About to ponder this awful possibility, Nancy turned again and saw

that the door into her brother's room was opening. Said Jack, in muffled, irritated tones: "What the dickens is the matter with you, Nancy? That old bed lets out a groan every time you move, and I'd say you've turned over every three minutes of the last hour. Why don't you go to sleep?"

"Too much to think about. I'm figuring out what would have happened if we hadn't come to Colorado."

"That's easy," Jack seated himself on the foot of the massive bed. "I'd be earning my car fares in a broker's office most likely; and you'd be dragging 'round Edgemere, pitying yourself and running up the telephone bill by calling your long-distance boy friends every few hours, just to kill time. Honestly, sis, can you imagine living our whole lives without having known Cousin Columbine, or the Adams, or—or going through that blizzard and everything? Maybe you'll laugh, but I feel lots older than when we came."

But Nancy didn't laugh. She said, thoughtfully: "You seem older, Jack. And I..."

Her self-analysis went no further, and after a moment the boy went on: "I'm mighty glad old Matt's got back into his stride. All this last week he's looked like a lost dog. I don't believe he's seen a lot of girls, and was sort of scared for fear he'd taken you too—well—seriously. Matt's such a dandy feller, Nancy, I'd hate to think he'd fallen for you too hard."

"So I'm not good enough for Matthew Adam?"

(To Be Continued)

### Cannot Be Answered

Food For Thought In Child's Question About Speed

The wisest sayings often come out of the mouths of children. A man motoring with his family in the country and discussing with his wife the present-day craze for speed and the disastrous results that so often follow excess of a reasonable rate of travel was interrupted by his little daughter's question:

"What is the speed limit?"

"Thirty-five miles an hour," he answered.

"Then why do they make cars that go faster?"

### Little Helps For This Week

Lift up your heads O ye gates, even lift them up ye everlasting doors, and the King of Glory shall come in. Psalm 24:9.

Fling wide the portals of your heart, Make it a temple set apart From earthly use for Heaven's employ, Adorned with prayer, and love, and joy. So shall your Sovereign enter in, And new and nobler life begin.

Thou art to know thy soul is the centre, habitation and kingdom of God. That therefore to the end the sovereign King may rest on that throne of thy soul thou oughtest to take pains to keep it clean and peaceable. Clean from guilt and defects, quiet from fears, and peaceable in temptations and tribulations. Thou oughtest then to always keep thine heart in peace that thou mayest keep pure that temple of God, and with a right and pure intention thou art to work, pray and obey as well as suffer whatever it pleases the Lord to send thee without being in the least moved.

Many of the farmers of Eastern Canada who fed Western lambs during the 1934-35 winter under the Dominion Lamb Feeding Project are placing increased repeat orders, in many cases asking for double the number of lambs they fed a year ago. The applications, particularly from Quebec and Ontario, reflect the abundant supplies of hay, grain, silage, and other crops in Eastern Canada. 2125

### LOCAL & GENERAL

Frank Raymond spent the week-  
end at his home at Lacombe.

Mr. R. Moffatt of Vulcan and  
Miss Scott of Claresholm spent  
Sunday with the former's parents  
Mr. and Mrs. J. E. Moffatt.

Cliff Robertson, who has been  
working in this district for the past  
two years, left on Tuesday for his  
home at Los Angeles Cal.

Mrs. Halliday of Crossfield who  
had been visiting her son Mr. How-  
ard Halliday, left for Edmonton on  
Friday.

Mrs. J. E. Moffatt arrived from  
Claresholm last week to join her  
husband who has taken over the  
managership of the Pioneer Garage.

Ray Harriman has been engaged  
as shop foreman and mechanic of  
the Pioneer Garage. Mr. Harri-  
man comes from Claresholm and  
has had extensive experience on all  
makes of cars.

Mr. Alex McFadden of Bounty  
Sask., visited with Mr. Alex Mc-  
Naughton this week. They were  
old school chums in Glengarry, Ont.,  
but had not seen each other for over  
forty years.

Mrs. Herman Hawkes left Friday  
for Timmins, Ont. to be with her  
son, George, who underwent a major  
operation Tuesday. From last re-  
ports the operation was successful  
and George was progressing favor-  
ably.

A group of neighbors and friends  
gathered at the home of Mr. and  
Mrs. Norman Weber to surprise  
and bid farewell to Miss Ivy Mitch-  
ell on Monday evening, December  
9, who is planning on a trip home  
to Louisville Kentucky, for a few  
months. We wish Ivy a safe jour-  
ney and a speedy return.

At the regular meeting of the  
I. O. O. F. Mrs. Evans resigned as  
treasurer, a position which she has  
held for a number of years. She  
was honored with a presentation  
for the interest she had taken and  
the work she had done for the  
Chapter. Mrs. H. Morgan was  
elected treasurer in her stead.

Miss Marian Sissons, who has  
been on the nursing staff of the  
Didsbury Hospital for the past two  
years, resigned from her position  
and left for her home on Sunday  
last. Before leaving Miss Sissons  
was presented with a gift by the  
Board as an appreciation of her  
work here. Miss Tuggle, who has  
been relief nurse at the hospital for  
some time was appointed on the  
regular staff in place of Miss Sis-  
sons.

A joint meeting of the Tuxis and  
C. G. I. T. groups was held Tues-  
day evening, when the girls had charge  
of the devotional service and the  
boys had charge of the intellectual  
period. Eddie Carleton gave a talk  
on North American Indians and  
their customs, also showing stone  
implements and relics. Jim Peters  
told an effective ghost story. At  
the close of the meeting a social  
gathering was held and lunch served.

### Things To Remember

Didsbury Table Cream Shippers'  
Meeting at Gillrie's Livestock Office  
Saturday afternoon, December 14th  
at 1:30. All shippers please attend.

Knox United Sunday School  
Christmas Tree and Concert Thurs-  
day, December 19 in the Church at  
8 o'clock p.m.

The High School Athletic Club  
has arranged for a dance in the  
Opera House on Friday, December  
20th. The proceeds will be used to  
buy equipment for the club.

### CARD OF THANKS

We wish to extend thanks to our  
many friends for their kindness and  
expressions of sympathy during our  
bereavement, also for the many  
floral tributes — A. VOGEL.

### Evangelical Church Notes

Next Sunday will be the close of  
our special meetings and Rev. F. F.  
Jordan will speak both morning and  
evening.
